Summary

Motivated, creative, and flexible Software Engineer looking for a career as a Software developer to further develop my technical skills in a fast-paced environment. My career goal is to assume a role which allows me to take responsibility for developing strategies and leveraging technology to build products in a well-respected company.

Skills

- Android Development
- Linux
- SQL/ NoSQL Databases
- Firebase
- Design Patterns
- Algorithm Design & Analysis
- Git
- Data Structures
- nodeJS

Highlighted Software Applications

YTS Torrent Server

[View Project](#)

This is an application that displays movies from the YTS database and the user can initiate a download which then downloads the movie to their machine and sends the progress status back to the mobile app and web app.

Filamu

[View Project](#)

This is an android app that fetches and displays movies and series from themoviedb API and the user can save them for offline viewing.

CryptoWatch

[View Project](#)

CryptoWatch is an android application for people looking to invest in cryptocurrencies by allowing them to track prices and find out the latest news about them.

Education

Bachelor of Science: **Information Technology – Jomo Kenyatta University of Agriculture and Technology** (September 2018 – June 2022)

Voluntary Activities

Technical Mentor, Young Scientist Kenya

March 2018 – August 2018

My Responsibility was to mentor High School Students doing various programming projects with one of my groups qualifying for the final round.
